2/7 Vadugan Street, Nalligoundan Palayam, Ingur, Perundurai

Summary

3rd-year B.E. Computer Science and Engineering student at Kongu Engineering College with hands-on experience in Python, full-stack web development, and SQL databases. Proficient in core Python (OOP, data structures, clean coding), REST API development, React.js frontend, and Git/GitHub. Certified in Machine Learning and Deep Learning (IBM) with a strong track record of delivering real-world projects. Eager to contribute from day one in a Python-focused full-stack internship role.

Education

2024 – 2028 B.E. Computer Science and Engineering at **Kongu Engineering College**
2020 – 2024 HSLC & SSLC at **Government Girls Higher Secondary School, Perundurai**

Projects

Cervical Cancer Detection (ML & Deep Learning) Jan 2026 – Apr 2026

Built a Python-based ML and Deep Learning system using TensorFlow/Keras with clean, modular OOP design. Applied data preprocessing pipelines and model evaluation using NumPy, Pandas, and Scikit-learn. Demonstrated strong Python fundamentals through reusable class structures and readable documentation.

Online Food Delivery Website Mar 2024 – Dec 2024

Full-stack application with a Node.js backend exposing REST APIs consumed by a React.js frontend. Designed and queried a relational SQL database for menu browsing, cart management, and order placement. Version-controlled via Git with feature branching and pull requests throughout development.

Library Management System Jul 2025 – Nov 2025

Java console application integrated with JDBC and an SQL database for book tracking and member management. Wrote optimised SQL queries for CRUD operations on relational tables and applied OOP principles for clean, maintainable code.

Club Registration and Campus Info Hub Aug 2024 – Oct 2024

Web-based campus portal using HTML, CSS, JavaScript, and MySQL; connected frontend forms to a backend database via REST-style endpoints. Managed the full codebase using Git with a structured branching and commit strategy.

Skills

Core Python	OOP, Data Structures, Clean Coding, Algorithm Design
Python Backend	FastAPI (learning), Flask, Node.js; REST API design & integration
Frontend	HTML, CSS, JavaScript, React.js; UI-to-API integration
Databases	MySQL, SQL (PostgreSQL-compatible), MongoDB
Version Control	Git & GitHub – branching, committing, pull requests
Other Languages	C, C++, Java, PHP
Tools	VS Code, Power BI, LeetCode, HackerRank, MS Office
Languages	English, Tamil

Certifications

- Machine Learning and Deep Learning – IBM
- Salesforce Fundamentals (1 Credit)
- Machine Learning and Deep Learning – Non-Formal Training
- Power BI – Non-Formal Training
- Human Computer Interaction – NPTEL
